

# TRiOCAM IPZ

Zoom, HD  
Ethernet Underwater camera

The SeaTRiO Underwater Zoom Camera is a powerful and compact imaging solution designed for the demanding needs of the ROV and diving market. With an impressive 30x zoom and high-resolution capabilities, this camera allows users to capture fine details from a distance without compromising image clarity. Whether inspecting underwater structures, marine life, or submerged equipment, the SeaTRiO Zoom Camera ensures precision and versatility. Its durable design includes a sapphire front lens that is highly scratch-resistant, offering long-term protection against harsh underwater conditions.

Paired with intuitive topside software, the SeaTRiO Underwater Zoom Camera provides seamless control, allowing users to easily adjust zoom levels, record video, and monitor footage in real time. The user-friendly interface ensures a smooth experience for both professionals and newcomers to underwater imaging. Built to be a competitive solution in the market, this camera delivers exceptional image quality and zoom performance, making it an essential tool for ROV pilots, divers, and marine professionals who require reliability and precision beneath the surface.

Lens	30x Zoom
Angle of view Horizontal	51°- 7.5° in Air, 37.6°- 5.6° in water
Angle of view Vertical	39°- 5.7° in Air, 29°- 4.2° in water
Power	12-30VDC @ 400mA
Operating temperature	-30° to 45° C
Transmission	H.264, H265, ONVIF, RTSP
Resolution	Up to 5MP
Best Case Latency	400ms
Connector	MCBH6M, others on request

Model	300m	4000m
Length	149	155
Diameter	69	71
Weight in Air	500g	780g
Weight in Water	10g	280g
Material	Acetal	Anodised Aluminium
